PROFESSIONAL SUMMARY

QA Professional with 2 years of experience in manual testing, specializing in financial applications. Proven expertise in end-to-end testing lifecycles, from test case design and execution to defect management within Agile/Scrum frameworks. Recently enhanced my qualifications by completing the "**MasterClass Software Testing with Jira & Agile - Be a QA Lead**", solidifying my skills in Jira for test management and Agile methodology. Demonstrated ability to ensure software reliability, improve quality assurance processes, and collaborate effectively with development teams to deliver robust software solutions..

TECHNICAL SKILLS

Programming Languages: Java, HTML5, CSS3

Database Management: MySQL, Oracle

Development Tools: Git, GitHub, Postman, IntelliJ IDEA, Eclipse, JIRA

Testing & QA: Manual Testing, Test Case Design, Bug Reporting, Regression Testing, QA Documentation, Agile methodology, Functional testing, Cross-platform testing, User acceptance testing, Debugging, Performance testing, Cross-browser testing, Scrum framework, Continuous integration, Bug reporting, Problem-solving,

Core Concepts: Object-Oriented Programming
Software development life cycle, Agile methodology

WORK EXPERIENCE

Software Tester (Digital Finance)

Think and Learn Pvt. Ltd., Kolkata | Oct 2021 – Aug 2023

- **Financial Application Testing:** Performed comprehensive manual testing on the TL_Pay application, specializing in payment workflows, transaction processing, and UI component validation.
- **Test Case Development:** Designed and executed structured test cases for financial features, ensuring robust quality assurance, and system reliability.
- **Bug Resolution and Collaboration:** Identified critical bugs in payment systems, and collaborated closely with development teams to implement effective solutions.
- **Backend Integration Validation:** Validated backend API integrations and database transactions to ensure seamless financial operations.
- **QA Documentation & Process Improvement:** Contributed to comprehensive QA documentation, regression testing protocols, and system validation procedures.
- Defined and identified test cases for new application development.
- Improved software quality by executing thorough test cases and identifying critical defects.

EDUCATION

Master of Computer Applications (MCA) | *Sep 2023 – May 2025* Techno India University, Kolkata | **CGPA: 8.45**

Bachelor of Computer Applications (BCA) | *Aug 2018 – Aug 2021* Techno India University, Kolkata | **CGPA: 7.7**

CERTIFICATIONS & ACHIEVEMENTS

- **MasterClass Software Testing with Jira & Agile - Be a QA Lead**

Issued: Sept 2025 | *Credential ID: UC-35380c2-b499-462b-9487-794fbbdf240*

Key Topics: Test planning & strategy in Agile sprints, Jira workflow configuration for QA, defect lifecycle management, and leadership techniques for coordinating testing teams.

- **Advanced Java Certification** | *Euphoria Genx* | Dec 2024 – Mar 2025

- **Core Java Certification** | *Euphoria Genx* | Jul 2024 – Sep 2024

- **HackerRank Java Basic Competition** | Successfully competed in online programming challenge

PROJECTS

Music Vault – Android Music Player App

Java, Android Studio, XML, MediaPlayer API

- Developed a feature-rich offline music player supporting MP3 formats with intuitive user interface
- Implemented custom playlist functionality using SharedPreferences and dynamic SeekBar controls
- Designed modular and scalable code architecture for enhanced maintainability and performance

Online Hotel Booking System

Java, JSP/Servlets, MySQL, HTML/CSS/JavaScript

- Built comprehensive full-stack web platform with secure user authentication, advanced room search, and integrated payment processing
- Optimized MySQL database queries for improved performance and implemented responsive design for cross-device compatibility
- Developed RESTful APIs for seamless frontend-backend communication

Library Management System

Java, JSP/Servlets, Oracle

- Created desktop solution featuring role-based access control for students, librarians, and administrators
- Implemented barcode search functionality and secured login system with comprehensive user management
- Designed efficient database schema and optimized queries for large-scale library operations
